

Table of Contents

Chapter 1: Introduction	1
1-1 The significance and necessity of maintenance and repair	1
1-2 Considerations on the use of this guidebook	2
1-2-1 Scope and use of this guidebook	2
1-2-2 Content of this guidebook	2
1-2-3 Relevant documents	3
Chapter 2: Concepts of Maintenance and Repair -- Approach to Administration --	5
2-1 The ideal form of administration	5
2-2 Management	7
2-2-1 Overview	7
2-2-2 Procedures	8
2-2-3 Hierarchical structure	13
2-3 Methods for implementing management	15
2-3-1 Methods of trunk road management	15
2-3-2 Methods used for activities for daily service roads	20
2-4 Approaches to management	22
Chapter 3: Implementation Plans for Maintenance and Repair	24
3-1 Overview	24
3-2 Surveys	25
3-2-1 Survey workflows	25
3-2-2 Road surface surveys	27
3-2-3 Structural surveys	33
3-3 Evaluation	37
3-3-1 Damage classification and evaluation classes	37
3-3-2 Evaluation of damage	37
3-4 Design	57
3-4-1 Types of maintenance and repair methods and selection of methods appropriate to damage levels	58
3-4-2 Specification of required performance	62
3-4-3 Road surface design	67
3-4-4 Example of road surface design	72
3-4-5 Structural design	74
3-4-6 Examples of structural design	79

3-4-7	Design considering LCC	92
Chapter 4: Implementation of Maintenance and Repair		95
4-1	Overview	95
4-1-1	Maintenance and repair methods	95
4-1-2	Materials for maintenance and repair	96
4-2	Maintenance methods	99
4-2-1	Patching and run-off of faulting	99
4-2-2	Sealant injection (sealing)	104
4-2-3	Cutting	106
4-2-4	Surface treatment	107
4-2-5	Washing of void choking	114
4-2-6	Surface roughening	114
4-2-7	Grooving	114
4-2-8	Thin overlay	115
4-2-9	Overlay on rutting	116
4-2-10	Road surface maintenance method with in-place surface recycling machines, etc.	116
4-2-11	Injection methods (undersealing methods)	118
4-2-12	Bar stitching	119
4-3	Repair methods for asphalt pavement	120
4-3-1	Replacement	120
4-3-2	Overlay	125
4-3-3	Surface and binder course replacement (mill and overlay)	129
4-3-4	In-place base course recycling	130
4-3-5	In-place surface recycling	133
4-4	Repair methods for concrete pavement	136
4-4-1	Replacement	136
4-4-2	Overlay	138
4-4-3	Local replacement	143
4-4-4	Thin concrete overlay	144
4-5	Maintenance and repair for adding functions and other purposes	144
4-5-1	Pavement to which new functions and capabilities are added	145
4-5-2	Pavement for changing the number of wheel passes causing fatigue failure	150
4-5-3	Paving for recovery after works related to road occupancy	151
Chapter 5: Confirmation and Inspections of Performance		155
5-1	Overview	155
5-2	Methods for checking and inspecting performance	155

5-2-1	Method for checking performance index values	155
5-2-2	Method for checking finished work and construction quality	156
5-3	Methods for checking performance index values	156
5-3-1	Methods for checking performance index values	156
5-3-2	Inspection of performance index values and their criteria	159
5-4	Inspection of finished work and construction quality	159
5-4-1	Methods for inspecting finished work and construction quality	159
5-4-2	Method for inspecting finished work and construction quality realized by maintenance methods	161
5-4-3	Items and methods for finished work quality inspection	164
5-4-4	Items and methods for construction quality inspection	166
5-4-5	Criteria for finished work and construction quality	168
Chapter 6: Accumulation of Construction Records		171
6-1	Overview	171
6-2	Construction records	171
6-2-1	Purposes of collecting construction records	171
6-2-2	Method for collecting construction records	171
6-2-3	Formats for recording construction information	172
6-3	Accumulation of construction records	176
6-3-1	Purposes of accumulating construction records	176
6-3-2	Method for accumulating construction records	176
6-4	Applications of construction records	177
6-4-1	Purposes of applying construction records	177
6-4-2	Examples of applications of construction records	177
Columns		
➤	The relationship between pavement target administrative values and everyday life and socioeconomic activities	13
➤	Logic models	14
➤	International roughness index (IRI)	16
➤	Maintenance and repair of pavement for sidewalks, bicycle lanes, etc.	153
Appendices		
	Appendix 1: Concepts for Setting and Amending Target Administrative Values	181
	Appendix 2: Concrete Examples of Pavement Administration for Trunk Roads	186
	Appendix 3: Concrete Examples of Pavement Administration for Daily Service Roads	196
	Appendix 4: Modes of Damage to Asphalt Pavement and Causes Thereof	201
	Appendix 5: Modes of Damage to Concrete Pavement and Causes Thereof	222

Appendix 6 Road Classifications and Pavement Design	238
Appendix 7: Pavement Structure Evaluation with FWD	255
Appendix 8: Measures against Flow Rutting	268
Appendix 9: Measures against Overloaded Vehicles	282
Appendix 10: Damage that Frequently Occurs in Other Countries	298
- Pavement damage that occurs due to underground water or water in base courses mainly in tropical countries and examples of measures against it -
