SPECIFICATIONS FOR HIGHWAY BRIDGES

PART III CONCRETE BRIDGES

MARCH 2012

JAPAN ROAD ASSOCIATION

Contents

CHAPTER 1 GENERAL 1

1.1 Scope 1
1.2 Definition of Terms 2
1.3 Fundamentals of Design Calculations 6
1.4 Construction Conditions Assumed for Design 7
1.5 Items to be Shown in Design Drawing 7

CHAPTER 2 FUNDAMENTALS OF DESIGN 9

2.1 General 9
2.2 Load Combinations in Design Calculations 10
2.3 Verification of Safety for Loads 11

CHAPTER 3 ALLOWABLE STRESS 14

3.1 General 14
3.2 Allowable Stress of Concrete 16
3.3 Allowable Stress of Reinforcement 22
3.4 Allowable Stress of Prestressing Steel 25

CHAPTER 4 VERIFICATION OF MEMBERS 27

4.1 General 27
4.2 Verification of Member Under Bending Moment or Axial Force 28
4.2.1 General 28
4.2.2 Effective Section 29
4.2.3 Verification Under Design Load 33
4.2.4 Verification Under Ultimate Load 35
4.3 Verification of Member Under Shear Force 42
4.3.1 General 42
4.3.2 Effective Section 47
4.3.3 Verification Under Design Load 51
4.3.4 Verification Under Ultimate Load 55
4.4 Verification of Members Under Torsional Moment 60
4.4.1 General 60
4.4.2 Effective Section 62
4.4.3 Verification Under Design Load 64
4.4.4 Verification Under Ultimate Load 68
4.5 Verification for Bond Between Reinforcement and Concrete 70

4.6 Verification Against Punching Shear 71

CHAPTER 5 EXAMINATION OF DURABILITY 73

5.1 General 73
5.2 Examination for Salt Damage 74

CHAPTER 6 SHAPE AND STEEL BAR ARRANGEMENT 80

6.1 Scope of Application 80
6.2 General 80
6.3 Shape and Member Dimensions 81
6.4 Minimum Amount of Steel 83
6.5 Tensile Reinforcement in Prestressed Concrete Structures 85
6.6 Steel bar Arrangement 87
6.6.1 Concrete Cover over Steel 87
6.6.2 Clear Distance Between Steel Bars 88
6.6.3 Anchoring of Reinforcement 91
6.6.4 Hook of Reinforcement and Bent Shape of Reinforcement 98
6.6.5 Joint of Reinforcement 101
6.6.6 Placement of Prestressing Steel 102
6.6.7 Anchoring of Prestressing Steel 105
6.6.8 Reinforcing Near an Anchorage 108
6.6.9 Placement of Main Reinforcement 115
6.6.10 Placement of Stirrups and Bent Bars 116
6.6.11 Placement of Reinforcement Against Torsional Moments 118
6.6.12 Reinforcement Along Haunch 119
6.6.13 Additional Bar 120

CHAPTER 7 SLAB 124

7.1 Scope of Application 124
7.2 General 124
7.3 Slab Thickness 126
7.3.1 Reinforced Concrete Slab 126
7.3.2 Prestressed Concrete Slab 128
7.4 Design Bending Moment of Slab 130
7.4.1 General 130
7.4.2 Design Bending Moment of Slab 131
7.4.3 Span of Slab 134
7.5 Connection Between Slab and Supporting Girder 136
7.6 Reinforcement Type and Bar Arrangement 137

7.7 Placement of Prestressing Steel 140
7.8 Cantilever Slab End and Slab on Cross Beams 141

CHAPTER 8 SLAB BRIDGES 144

8.1 Scope of Application 144
8.2 General 144
8.3 Structural Analysis 145
8.3.1 General 145
8.3.2 Bending Moment of Simple Slab Bridge with No Cantilever Slab 147
8.4 Dimension of Cross-section and Bar Arrangement 149

CHAPTER 9 T-GIRDER BRIDGE 158

9.1 Scope of Application 158
9.2 General 158
9.3 Structural Analysis 160
9.4 Structures of Main Girders, Cross Beams and Slabs 161

CHAPTER 10 BOX GIRDER BRIDGES 164

10.1 Scope of Application 164
10.2 General 164
10.3 Structural Analysis 165
10.4 Design of Cross Beam at the Support and Diaphragm 169
10.5 Reinforcement of an Opening Structures of Lower Flange and Web 170

CHAPTER 11 COMPOSITE GIRDER BRIDGES 173

11.1 Scope of Application 173
11.2 General 174
11.3 Joint of Girder and Slab 178
11.4 Structural Details of Slab 182

CHAPTER 12 ARCH BRIDGES 185

12.1 Scope of Application 185
12.2 General 185
12.3 Structural Analysis 187
12.4 Verification for Buckling 188
12.5 Minimum Amount of Reinforcement for Arch Rib 189
12.6 Side Walls of Spandrel Filled Arch Bridges 190
12.7 Diaphragm Between Arch Ribs 190

CHAPTER 13 CABLE-STAYED BRIDGES 192

CHAPTER 18 EXTERNAL CABLE STRUCTURES 241
18.1 Scope of Application 241
18.2 General 241
18.3 General Design of Towers 246
18.4 Anchorages and Deflectors of an External Cable 247
CHAPTER 19 DESIGN OF OTHER MEMBERS 248
19.1 Support Experiencing Horizontal Forces 248
19.1.1 Scope of Application 248
19.1.2 General 248
19.1.3 Bearing Reinforcement 250
19.2 Deep beam 251
19.2.1 Scope of Application 251
19.2.2 General 252
19.2.3 Placement of Steel Reinforcement 253
19.3 Corbel 253
19.3.1 Scope of Application 253
19.3.2 General 254
19.3.3 Placement of Steel Reinforcement 255
19.4 Joints of Hybrid Structure 255
19.4.1 Scope of Application 255
19.4.2 General 256
19.4.3 Joint Structure and Steel Placement 257
CHAPTER 20 CONSTRUCTION WORK 259
20.1 Scope of Application 259
20.2 General 259
20.3 Construction Procedure Document 260
20.4 Materials 260
20.4.1 General 260
20.4.2 Concrete 261
20.4.3 Steel 265
20.4.4 Sheath 265
20.4.5 Anchorage Device and Coupler of Prestressing Steel 266
20.4.6 Grout 266
20.4.7 Pregrouted Prestressing Steel 268
20.4.8 Adhesive 269
20.4.9 Storage 270
20.5 Ready-mixed Concrete 271

13.1 Scope of Application 192
13.2 General 193
13.3 Structural Analysis 194
13.4 Stay Cable and Anchorage 196
13.5 Stay Cable Anchorage 198
13.6 General Design of Towers 199

CHAPTER 14 CONTINUOUS STRUCTURES 200

14.1 Scope of Application 200
14.2 General 201
14.3 Structural Analysis 201
14.3.1 General 201
14.3.2 Design of Intermediate Supports and Joint 205
14.4 Structure of Intermediate Supports and Joints 208
14.5 The Design of Continuous Girder Bridge by the Erection of Precast Girder 210

CHAPTER 15 CURVED STRUCTURES 213

15.1 Scope of Application 213
15.2 General 213
15.3 Structural Analysis 214
15.4 Transverse Design 216
15.5 Reinforcement and Tendon Placement, and Bearing Structure 218

CHAPTER 16 RIGID FRAME STRUCTURE 219

16.1 Scope of Application 219
16.2 Structural Analysis 219
16.3 Joint Between Rigid Frame Members 220

CHAPTER 17 PRECAST SEGMENTAL STRUCTURES 226

17.1 Scope of Application 226
17.2 General Matters of Design 226
17.3 Design of Joint 227
17.3.1 General 227
17.3.2 Verification of Bending Stresses 230
17.3.3 Verification of Shear Forces 231
17.3.4 Verification of Torsional Moments 234
17.3.5 Design of Steel Joint Keys 235
17.3.6 Design of Concrete Joint Key 237
17.3.7 Reinforcement of Joint and Placement of Joint Key 239

20.6 Concrete Work 272
20.7 Work and Placement of Reinforcement 279
20.8 Prestressing Steel Work and Tensioning Work 281
20.9 Construction of Structure Using Precast Members 288
20.9.1 General 288
20.9.2 Fabrication of Members 288
20.9.3 Transport and Storage 290
20.9.4 Joint 290
20.10 Grouting Work 292
20.10.1 Grout 292
20.10.2 Pregrouted Prestressing Steel 296
20.11 Form and Support 299
20.11.1 General 299
20.11.2 Design and Construction 300
20.12 Erection 302
20.12.1 General 302
20.12.2 Safety Verification 303
20.13 Inspection 304
